

**SOUTH CAROLINA**  
ELECTION COMMISSION

---

February 2024

**USE OF SEALS:  
DS200 TABULATOR/SCANNER AND  
ABSENTEE BALLOT BOXES**

---

## Use of Seals

Generally, counties had adequately sealed the 5 locations on the DS200 scanner/tabulator and the absentee ballot box—boxes required at early voting centers for those returning absentee ballots in-person at a center—during our visits to the 77 early voting centers open for the 2024 Democratic Presidential Preference Primary. However, we did find instances in which seals were missing on the DS200 tabulator/scanner and the absentee ballot box.

Auditors conducted unannounced visits to all early voting centers during the two-week early voting period for the election and notated if seals were present on DS200 tabulators/scanners and absentee ballot boxes.

Sealing the DS200 tabulator/scanner and absentee ballot box provides greater assurance that all authorized ballots are counted during an election.

---

## State Law and SEC Seal Requirements

The following sections describe the required seal locations on the DS200 tabulator/scanner and absentee ballot box as well as the different types of seals. Figure A below shows examples of these seals and Figure B shows the five locations seals must be affixed on the DS200 tabulator/scanner during voting.

### Thumb Drive and Voting Equipment Base

Per S.C. Code §§7-13-1670 and 7-13-1750, voting equipment must be sealed after it is prepared for an election. After preparation, the State Election Commission's (SEC) Election Preparation and Results Accumulation Guide (EPRAG) requires a tamper-evident tape seal to be placed over the flash drive door and seals on the front, right-, and left-side latches of the base; the latter three seals are often spring lock, pad lock, or pull tight (zip-tie-like) seals.

When opening the equipment for voting, the front latch seal is removed to open the screen and scanner. The right- and left-side latches remain sealed during voting.

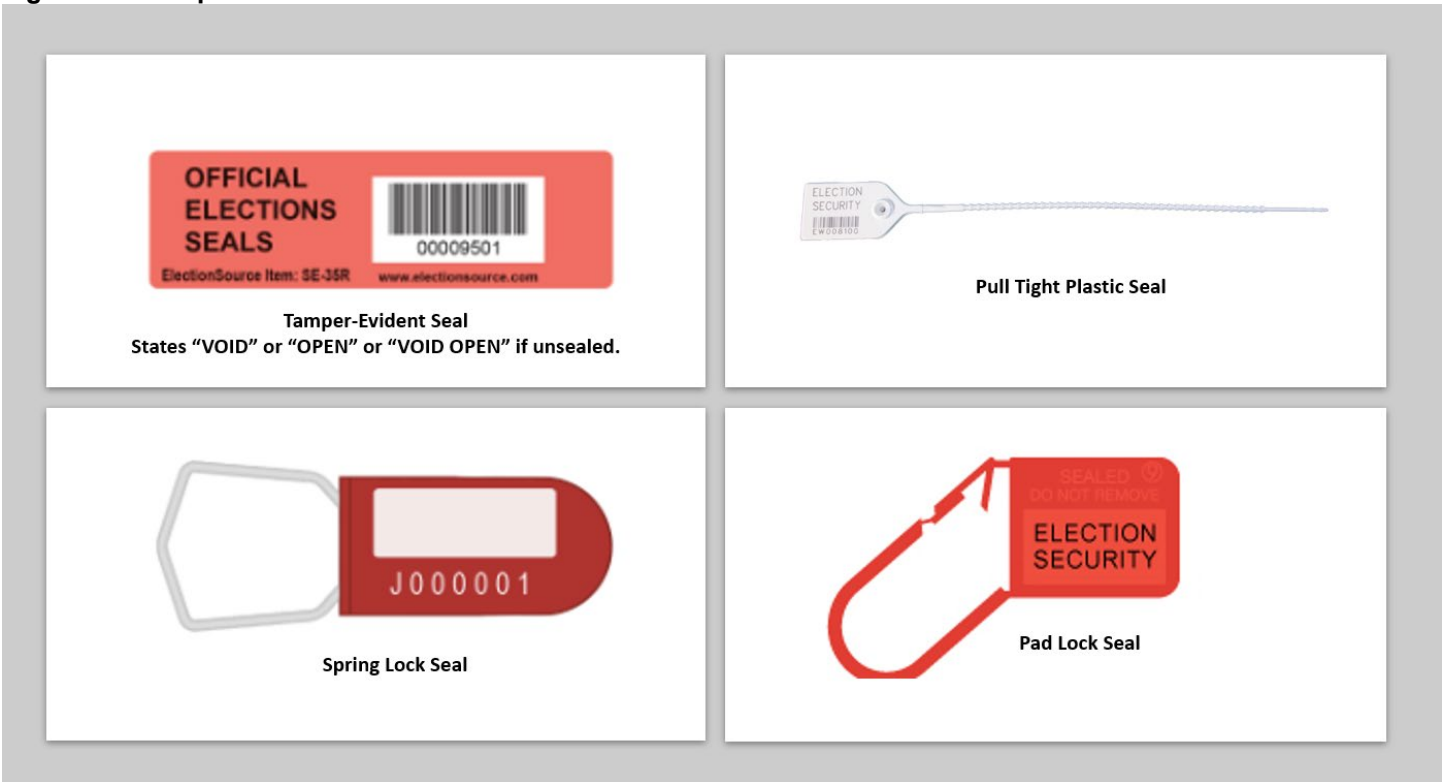

### Ballot Bin and Provisional/Emergency Doors

S.C. Code §7-13-1800 requires the ballot bin door, also known as the main ballot door, and provisional/emergency ballot door on the scanner to remain *locked*, except for good and sufficient reason. Additionally, the SEC's EPRAG requires the use of seals on the ballot bin door and provisional/emergency door; often used are spring lock, pad lock, or pull tight (zip-tie-like) seals. Both locations must be sealed during voting.

### Absentee Ballot Box

Absentee ballot boxes—boxes required at early voting centers for those returning absentee ballots in-person at a center—must also be sealed. S.C. Code §7-15-385 permits personal delivery or delivery by an authorized member of applicant's immediate family of absentee ballots to an early voting center. The SEC's Early Voting Standardized Operating Procedures requires these boxes to be sealed throughout the day. Often used are spring lock, pad lock, or pull tight (zip-tie-like) seals on this box.

## Unannounced Visits

Auditors, in teams of two, conducted unannounced visits during early voting from January 22<sup>nd</sup>–26<sup>th</sup> and January 29<sup>th</sup>–February 2<sup>nd</sup> to each of the 77 early voting centers across the state for the 2024 Democratic Presidential Preference Primary.

Auditors independently checked if seals were affixed as required to absentee ballot boxes and DS200 tabulators/scanners. Options included: Yes, No, and Not Visible. A selection of Not Visible meant auditors could not see if a seal or ballot box was present from their vantage. *A notation of Not Visible does not mean a seal was not present or an absentee ballot box was not present; this should not be regarded as a negative.* Additionally, if a seal was voided but still present, it was indicated as No. Finally, there were instances in which auditors had conflicting results due to perspective; these should be interpreted as inconclusive.

Sealing the DS200 tabulator/scanner and absentee ballot box provides greater assurance that all authorized ballots are counted during an election.

The following pages provide the results for each early voting center by county.
