

Just prior to the 2024 General Election, the state's tabulation device was updated from the DS200 to the DS300 in all counties. The following audit forms in type format were not updated to opt for a DS300 as the tabulation device. Some counties manually updated the form to show DS300. For all other forms that indicated a DS200, the tabulation device was a DS300.

Comments: Clerk's EPB showed one ballot less than scanner count. This was due as a result of a poll worker rescanning a jammed ballot twice, not realizing the ballot had already counted. The hand count audit performed at the end of the day also revealed one ballot less than count on the scanner. The post-election count also revealed one ballot less than scanner.
