Hampton County Hand-Count Audit Report - Addendum

During the post-election hand-count audit of the Varnville precinct, discrepancies were identified between the hand-count results and the reported vote totals. A review of the ballot images revealed that four (4) ballots contained contests and candidates from the Statewide Primary Election rather than the Statewide Runoff Election.

Findings

An onsite review was conducted at the Hampton County Voter Registration and Elections Office to determine the cause of the discrepancies. The review included an inspection and testing of voting equipment, an evaluation of equipment preparation procedures, an assessment of staff responsibilities, a review of equipment records, and an examination of facility conditions.

Upon conclusion of the inspection and testing of the ballot-marking devices (BMDs) assigned to the Varnville precinct, it was determined that one (1) BMD was loaded with the incorrect election configuration. Specifically, the device contained the Statewide Primary Election ballot style instead of the Statewide Runoff Election ballot style. All other BMDs inspected were confirmed to be properly configured for the Statewide Runoff Election.

Conclusion

The review determined that the discrepancies resulted from a single BMD being deployed with an incorrect election configuration. This resulted in four (4) ballots being cast for the incorrect election.
